Dear Mr Weisberg,

It was certainly interesting hearing you speak at HUNTER COLLEGE and I was also glad I had the chance to meet you. Enclosed are all the articles I have collected on various assassinations since I saw you at Hunter.

I was surprised to find out that James Earl Ray fired Jim Lesar, what will this mean for the future of the case? Will you and Mr Lesar continue work on the case?

I have little hope that the new CIA Committee will look into JFK's assassination. Schweicker's been the only person calling for a new investigation. Both Church and Hart disagreed that there was a cover-up. What are your feeling on this?

I hope your phlebitis is under control. Will you be writing anything that will be published in the not too distant future?

The material ~~is~~ needs no explanation. I hope it will be of some use to you. As usual you have my best wishes.
